

## The EyeTech Difference.

We know as a patient or caretaker, you don't have the time to figure out another piece of technology. That's where we truly go above and beyond. Every device from EyeTech, includes free unlimited Success Coaching, a first in the industry.

Our Success Coaches work with both users and their caregivers to ensure that using the EyeOn becomes second nature - from initial consultation, to setting up the device specifically for the user, through the time when it becomes an indispensable part of daily life. We make sure the device works for a patient, and that they continue to get the most out of it, long into the future. Think of our Success Coaches as an extension of your support team - for the duration, and committed to your success.

Our diverse team of Success Coaches includes seasoned clinicians and therapists who understand that the right device can change a life. Our team has years of experience working in the AAC industry and many have a personal connection that drives them to go above and beyond in service to patients, their clinicians, caregivers, and loved ones. Experience the EyeTech difference.
